

In the current industrial world, market needs are more and more uncertain and unstable: shortened product life cycle, rapid changes in product mix, unpredictability of quantities...

To remain competitive, factories must be equipped with production methods whose return on investment are often incompatible with the instability of market needs.

## Our solution? Automated workstations:

- ▶ reconfigurable
- ▶ adjustable
- ▶ connected
- ▶ ergonomic
- ▶ recyclable

### 3 sizes of pallets:

160 x 160 cm, 240 x 240 cm  
and 240 x 320 cm

### 4 widths for workstations:

800 to 1 400 mm

### How to reconcile flexibility and productivity?

**Crescendo** is an innovative concept for standard automated workstations that are both modular and adjustable. Crescendo uses the latest technologies for better performance and connectivity.

Crescendo workstations and arms can be combined, whatever their width, for a maximum flexibility. With arms that are moveable within the period of a few minutes, and rapid interconnections between workstations, you can easily and quickly make up and adapt your own production line.

**Boost the capacity of your line to match your clients current needs.**

Upgradability  Invest just-enough to start with and reallocate your assets as soon as required

Versatility  Integrate simply and easily new processes into your existing lines

Mobility  Reconfigure or relocate workstations easily within tight spaces

Standardization  Be reassured with a level of high reliability and controlled deadlines

## With the **Crescendo** concept

- ▶ Play a part in transformation 4.0
- ▶ Benefit from the full potential of your production equipment
- ▶ Increase your competitiveness
